PROFESSIONAL SUMMARY

Android Developer with 4+ years of production experience in Kotlin and Java, with 34+ applications shipped to the Google Play Store and 4.7M+ combined installs. Builds apps from an empty project and takes over existing codebases, structuring work around MVVM with Room for local persistence and Retrofit for networking. Experienced with Firebase (Remote Config, Crashlytics, Cloud Messaging), Google Play Billing, and ad monetization across AdMob, AppLovin, and Unity Ads. Focused on crash reduction, faster cold starts, and stable releases; currently moving UI work to Jetpack Compose. Open to full-time, contract, or remote roles, and to relocation.

PROFESSIONAL EXPERIENCE

Android App Developer — 3TechSoft Oct 2025 – Present · Rawalpindi, Pakistan

- Build and maintain Kotlin applications with performance, stability, and reliability as the release bar.
- Integrate AI-based features into existing products to extend what the apps can do.
- Run monetization across AdMob, Unity Ads, and AppLovin without degrading the user experience.
- Write reusable adapters, base classes, and utilities that cut duplication and speed up new features.
- Extend Islamic apps — Quran, Tasbeeh, and prayer times — with new features and bug fixes.
- Improve multilingual voice keyboards for Urdu, Arabic, and Amharic.
- Track down crashes proactively through Crashlytics and log analysis.

Android App Developer — Funprime Technologies Sep 2023 – Jul 2025 · Islamabad, Pakistan

- Developed apps from scratch and modernized existing ones on MVVM with Room for local data.
- Shipped Firebase Remote Config, Crashlytics, and Cloud Messaging for engagement and stability.
- Integrated Retrofit and REST APIs with reliable data handling across network conditions.
- Applied MVC, MVP, and MVVM as each codebase required, keeping structure maintainable.
- Implemented ExoPlayer with caching for smooth media playback, and AdMob monetization tuned for minimal user disruption.
- Followed Material Design guidelines for responsive, modern UI.

Android App Developer — Compulogic Standard Solutions May 2022 – Sep 2023 · Islamabad, Pakistan

- Turned concepts and designs into working Android applications in Java and Kotlin.
- Used Firebase and SQLite for data storage and management.
- Integrated third-party libraries and SDKs across multiple products.
- Managed live Play Store apps: updates, review monitoring, and acting on user feedback.
- Integrated AdMob and AppLovin for monetization.

EDUCATION

BS Computer Science — Preston University Oct 2020 – Sep 2024 · Islamabad, Pakistan

TECHNICAL WRITING

- Android tutorials published on Medium and DEV Community: detecting incoming calls in Android Studio, building a QR and barcode scanner, and wiring Bottom Navigation to the Navigation Component in Kotlin.

MY WORK

- VPN Browser: Private Incognito
- Mahjong Boss: Match Tiles Saga
- English Dictionary Offline
- Urdu to English Translator
- AL Quran Kareem – Holy Quran
- Easy Arabic Voice Keyboard
- Daily Quran Majeed Offline
- Holy Quran: 16 Lines Per Page
- Fast Urdu Voice Keyboard
- Easy English Voice Keyboard
- Video Downloader & Locker
- Photo Editor & Quotes Maker
- Speech to Text & Text to Speech
- AI Photo Maker
- Ai Quran Pak GPT
- Smart Multi Tools
- PDF Viewer & Image to PDF
- Video to Audio Converter
- Mute Video
- Audio Remover Pro
- Video to Audio Pro
- Speech to Text Pro
- WiFi Password Scan & Map
- Digital Compass & Weather
- Fingerprint Live Wallpaper
- Business Card Maker
- Prank Call
- Football Keyboard Themes
- Tasbeeh Counter
- Quran Majeed – Islamic App
- Voice Reverse — Flip Singing
- Funny Sounds Horn
- Battery Charging Animation
- Flash Alerts on Call
